

REMARKS

In view of the above amendments and the following remarks, reconsideration of the objections set forth in the Office Action of July 29, 2008 is respectfully requested.

In the outstanding Office Action, the Examiner objected to the form of the specification. In particular, it *appears* that the Examiner was objecting to the section headings set forth in the original specification, and requesting that proper section headings be provided. In view of this objection, the specification has now been revised in order to comply with the Examiner's request. Consequently, it is respectfully submitted that the Examiner's objection to the specification has been overcome.

In addition, new independent claim 21 has been added by this amendment. It is submitted that independent claim 21 is also clearly patentable over the prior art of record, primarily for those reasons set forth by the Examiner in item 3 spanning pages 3 and 4 of the outstanding Office Action.

In view of the above amendments and remarks, it is submitted that the present application is now in condition for allowance. However, if the Examiner should have any comments or suggestions to help speed the prosecution of this application, the Examiner is requested to contact the Applicant's undersigned representative.

Respectfully submitted,

Takeshi OOTSUKA et al.
